

WHAT IS FAR-INFRARED(FIR)

Infrared heat is produced by the sunlight, the main source of all lives on Earth. The sun supplies energy to us and is very important to our health. The sunlight is actually a combination of several different lights; some of them are visible, and some invisible. After many years of research and clinical trials of scientists and medical experts in NASA and Japan, discovered the **Electromagnetic Spectrum** of the infrared ray within the sunlight, which is very useful for the growth of plants and animals. It is found to have a **Far Infrared** with the wavelengths of between 4 - 14 microns. As a fact, most life on the planet would not do very well without it. The discovery of FIR has a vital importance to our everyday bodily function at the molecular level.

FIR HEAT AND HUMAN BODY

FIR HEAT is the heat you feel penetrate your skin when you stand in the sun - and miss when you walk into the shade. Infrared energy is also given off as body heat.

The human body can absorb infrared heat. Infrared energy is measured in wavelengths as microns. Our body's cells have diameters of around 10-20 microns. So waves of this length will vibrate them, in the same way as an opera singer can vibrate a distant glass with a specific note, an effect known as resonance.

WHY PHOTON DOME PLUS ?

THE G.M.P 4.14

generates FIR heat in the 7- to 14 micron range with a peak at 9.4 microns, the same as the human body, making it easier to absorb. Easier absorption also means that the infrared heat penetrates deeper into body tissues.

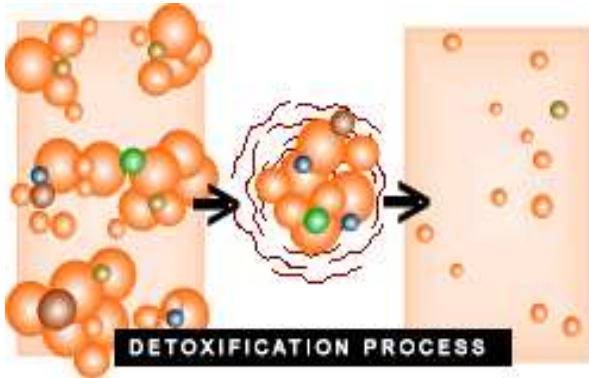

THE G.M.P 4.14

WHY G.M.P 4.14

DETOXIFICATION

The greatest news in the development of **FIR** technology is its application to the evolving science of detoxification.

The warming effect of FIR can stimulate your metabolism, promoting the elimination of some nasty toxins that accumulate in your cells. Such things as poisons, carcinogenic heavy metals, toxic substances from food processing, lactic acid, free fatty acids, uric acids and subcutaneous fat associated with aging and fatigue.

When FIR rays reach the water molecules within your body's cells, the water begins to vibrate. The vibration is what enables the release of these toxic materials.

THE G.M.P 4.14

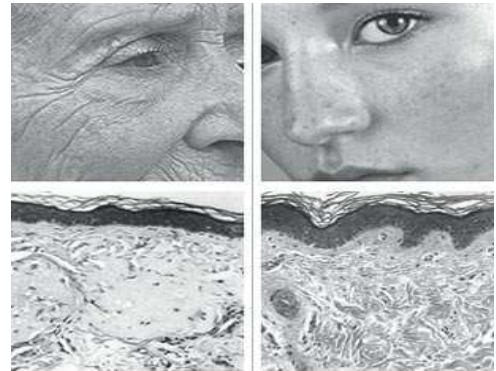

produces FIR rays which cause the cell molecules vibrating in resonance. Such vibration help to get rid of the toxic substance attached on the surface of the cells. Therefore, circulates better through the cells, activating of thus the sanguineous circulation and producing an enormous share anti-inflammatory, providing the desinpoisoning of the cells through the desacidification of the water of our organism.

ANTI-AGING

When the cells absorb the **FIR** energy, they become more active and therefore promote metabolism process.

FIR also accelerates the metabolic exchange between blood and body tissue. Helping the delivery of fresh nutrients and oxygen to your cells, this process can reserve the aging process.

Researchers discovered that FIR helps to retain a good level of cardiovascular fitness where regular aerobic exercise was not possible.

EIGHT LOSS

Stress, environmental pollutions and improper diet are important factors for toxin accumulating and the slowing for metabolic rates.

As a result, the cellular functioning eventually slow to the point of becoming dormant and the cells are overburden of excess fat, fluids and waste by-products. These cells are then altered because they are lack of oxygen to burn the fat and would eventually transformed into 'fat cell'. In the further stage, the swelling of the fat cells on the skin would become unpleasantly visible. Therefore, detoxification is essential for weight loss.

THE G.M.P 4.14 provides FIR rays which accelerate the body's purifying process. Fresh nutrients and oxygen have been taken into the cells, alongside that natural waste and toxins being flushed out. The body receive a dramatic recovery in figure slimness and healthiness. Using **THE G.M.P 4.14**, it is possible to burn more than 400 calories in just 20 minutes session.

OTHER BENEFITS

TONING AND TUNE UP

By balancing out the body metabolism, **THE G.M.P 4.14** provides ideal treatment to have on either the short-term or regular basis. Even without any particular physical symptom, a general toning and tune up will leave us more relaxed.

THE G.M.P 4.14 can make you sweat the similar amount as a 10km run with far greater comfort. This profuse sweating also deeply cleanses the skin, creating beautiful and improved tone, texture and colour.

MEDICAL SAUNA

Research Professionals recognise the benefits of **THE G.M.P 4.14** and are recommending them to various hospitals and patients suffering from

- Back pain
- Aching joints
- Stiff neck and frozen shoulder
- Sciatic hip pain
- Arthritis and rheumatism
- Stress and Fatigue

BEAUTY

A treatment of 20 to 40 minutes in **THE G.M.P 4.14** provides:

- Cleansing the skin
- Slimming purposes
- Reducing lactic acids
- Reduction of joint pains
- Reduce of fatigue
- Relief of pains in the bones, muscles and organs
- Detoxify your body
- Improving the human immune system
- Removing impurities from the system

RELAXATION & ENERGIZE

The most immediate and noticeable effect is the tremendous relaxation that FIR heat provides. This deep relaxation alone can have a profound impact on your health in a positive way. Read, listen to music, carry on a pleasant conversation with a friend or relative, or meditate while in the FIR sauna. In the comfortable warmth, your stress will melt away, leaving you with a feeling of total rejuvenation.

Unlike a traditional heat-driven sauna that leaves you tired and drained of energy after being in them, a session in **THE G.M.P 4.14** FIR Sauna has the opposite effect of Energizing you!

TRADITIONAL SAUNA vs. THE G.M.P 4.14		
Heat Source:	THE G.M.P 4.14 (FIR Heat)	Traditional Saunas
Heat Transmission	100% Ceramic FIR Element Direct FIR	Electric or gas stove - Convection Heat
Temp Requirements	40-60 °c	80-100 °c
Pre-Heat Time	5 to 10 minutes	30 to 90 minutes
Fresh Air Circulation	Allowed.	Prohibited due to cooling affect.
Energy Expense:	£2 to £5 PER MONTH	£5 to £10 PER DAY
Wiring Requirements	None. Plug in.	Wiring and plumbing needed.
Time Spent in Sauna	20-50 minutes	10-20 minutes due to high temps
Installation Location	Can be moved.	Permanent location due to weight
Area Requirements	2.2 square meter of floor space	Entire room due to high heat.
Installation	No installation required	Can take days by tradesman.

THE G.M.P 4.14 Specification

Interior Temperature: 40-60° c
Temperature Normal Use: 45° c

Current: 1000 Watts
Voltage: 220 Volts
Colour: White
Weight: 115Kg
Measures: 240 x 100 x 95 cm

BUSINESS BENEFITS

- New equipment is always an opportunity to let our members know you are investing in their welfare
- Communicated via a Newsletter is also a useful method of reminding non-active member to pay you a visit
- Demonstrates the success of your business
- Automatically create curiosity among your clients to bring more business
- User-Friendly Interface with minimum staff assistant (no assistance since the first use by your clients)
- Minimum maintenance
- Minimum running costs
- Benefits of Lease Purchase using working revenue to make the payments (Subject to status)
- For leisure facilities within a Hotel or Conference centre, a session on **THE G.M.P 4.14**, included in your 24 hour delegate rate, will provide your organisation with a unique selling point and ultimately, repeat business

TURN OVER AND LEASING

- 120 minutes per day, at £1 or 1€ per minute for six days a week and 50 weeks per year produces a turn over of £36,000 or 36 000 € per year
- ALTERNATIVELY, 120 minutes per day, at 75p or 0.75 € per minute for six days a week and 50 weeks per year produces a turnover of £27,000 or 27 000 € per year

We use very conservative figures for the above calculations and would expect you to be selling far in excess of 120 minutes per day

- **Leasing Benefit**
 - Uses working revenue to pay for the Bed
 - VAT and interested can be claimed, if VAT registered
 - Taxable profit can be reduced by 100% of the value of the rentals
 - Price is fixed for the duration of the lease
